

MS-BAIS Advising FAQ

How does the MS-BAIS program work?

The program requires a minimum of 33 credits, which must include 5 core classes, 3 MS-BAIS electives and 3 additional electives from our department or other departments if they are 6000 level courses relevant to the major. Most of these classes are 3 credits each. In addition, you can also take MS-BAIS internships and independent study, which are 1-2 credit courses and those courses will also count toward your 33 credit degree requirements.

Before registering for any out-of-department electives, please consult Dr. Johannes Reichgelt to make sure that this course would count toward your degree requirement. For non-departmental courses, you will need a permit from that department.

What are the different core and elective course options that I have for my MS-BAIS degree?

MS-BAIS core classes:

1. ISM 6124: Advanced Systems Analysis & Design (Prerequisite: Systems Analysis & Design or equivalent professional knowledge)
2. ISM 6218: Advanced Database Management (Prerequisite: Database Design/Management or equivalent professional knowledge)
3. ISM 6225: Distributed Information Systems (Prerequisite: Object-Oriented Programming or equivalent professional knowledge)
4. QMB 6304: Analytical Methods for Business (Prerequisite: One prior course on inferential statistics at undergraduate or graduate level)
5. ISM 6155: Enterprise Information Systems Management (MS-BAIS capstone)

NOTE: In order not to jeopardize your chances to graduate on time, it is crucial that you complete the core courses as early as possible. We have had a number students who did not take core courses when they were available, and then had to postpone their graduation. This is particularly problematic for international students who have to maintain a full course load and therefore may have to take more courses than is strictly necessary to complete their program. While we can ensure that there are sufficient seats in the core courses overall, we cannot guarantee that you will be able to take a core course in the semester that you want.

MS-BAIS electives:

We have many electives. This is a partial list of approved electives in no particular order. Refer to our course catalog for a complete list.

1. ISM 6136: Data Mining
2. ISM 6419: Data Visualization
3. ISM 6137: Statistical Data Mining (Prerequisite: QMB 6304)
4. ISM 6251: Data Science Programming (Prerequisite: ISM 6136)
5. ISM 6208: Data Warehousing (Prerequisite: ISM 6218)
6. ISM 6562: Big Data for Business (Prerequisite: ISM 6225)
7. ISM 6328: Information Security & Risk Management

8. ISM 6156: ERP & BPM
9. ISM 6316: Project Management
10. ISM 6930: Text Analytics (Prerequisite: ISM 6251)
11. ISM 6577: Business Continuity and Recovery Planning
12. ISM 6945: BAIS Internship (1 credit for both full-time and part-time internships, max 3 credits for 3 semesters)
13. ISM 6905: Independent Study (1 or 2 credits)

Prerequisites for any class must be completed in a PREVIOUS semester. Concurrent enrollment in a class AND its prerequisite in the same semester is not allowed. If you need help with prerequisites, please e-mail Dr. Reichgelt.

Are there any ISM/QMB classes that can't be used towards graduation?

Yes. Classes that can't be used as MS BAIS electives include any undergraduate class, most 2 or 3 credit MBA courses or MBA sections of MS-BAIS courses such as **ISM 6930-Data Analytics for Business, QMB 6305, QMB 6358, QMB 6603, ISM 6021, ISM 6123 (Fund of Data Mgmt & Analysis), ISM 6436, ISM 6217**. Some other graduate College of Business classes may be ineligible. Please contact Dr. Johannes Reichgelt if you plan to register for any of these courses or have any questions in this regard.

How many credits can I register for?

There is a limit to the number of courses you can register for. In the regular semesters, i.e. Fall and Spring, you can register for at most 4 courses (12 credits). In the Summer, you can register for at most 2 courses (6 credits). There are additional rules that apply when you have a full-time internship and these rules are explained in the CPT module. USF insists that you enroll for at least 2 credits in your graduating semester. This includes the Summer semester.

The Lean Six Sigma course counts towards the 12 credits if you take in the Spring, but not if you take it in the Fall. The Spring course is in the middle of the semester; the fall course is offered before the Fall semester starts.

How can I register for alternate calendar classes?

Use this link: <https://www.usf.edu/registrar/register/altcalendar.aspx> 
(<https://www.usf.edu/registrar/register/altcalendar.aspx>).

Contact the registrar's office at 974-2000 for if you have concerns about late add fees. You should be able to drop alternate classes during the first scheduled week without penalty, but again - this is the registrar's domain, so always check with them to confirm.

Some courses require a permit. How do I get one?

If you look up the course on <https://usfweb.usf.edu/DSS/StaffScheduleSearch> 
(<https://usfweb.usf.edu/DSS/StaffScheduleSearch>), you will see link in the description of the course. Click that

link and complete the form that comes up. Please do NOT email the professor for the course. They cannot issue permits.

What delivery modes are courses offered in, and how can I find out the delivery mode of a course?

We offer courses in three different modes:

- Face-to-face
- Asynchronously online
- Synchronously online

The difference between the latter two is that the latter will require synchronous meetings via Teams, whereas the former does not.

If a course section in <https://usfweb.usf.edu/DSS/StaffScheduleSearch> 

(<https://usfweb.usf.edu/DSS/StaffScheduleSearch>) has both a time associated with it and a classroom, it is a face-to-face course. Online courses will always have Off-Campus in the Campus field. Synchronous online courses will contain a note that gives the dates on which the classes meet. If there is no such note, the class is asynchronous, even though the Time field will say TBA. The system will not allow us not to put a time in that field.

Notes:

1. The *Off-Campus* note is likely to be followed by the name of a campus (e.g., *Off-Campus - Tampa*, or *Off-Campus - Sarasota-Manatee*). Ignore the name of the campus. This is included for internal financial purposes and does not affect how the course is delivered.
2. Online courses are a little more expensive than face-to-face courses. USF charges an additional fee for online courses. At the moment, the charge is \$30.
3. If you are an international student, you must take the majority of your courses on your home campus, which is Tampa. Since the face-to-face classes are in general Tampa classes, this is not a problem for most semesters, but it may become an issue for your last semester. More details are provided in the RCL module.

How do registration wait-lists work at USF?

Please see: <http://www.usf.edu/registrar/resources/waitlist> 

(<http://www.usf.edu/registrar/resources/waitlist/>) Please do not place yourself on more than one waitlist for the same course. If you do, we will remove you from all waitlists for that course.

Can I take all my classes online?

From Fall 2023 onwards, international students can take at most one course online, and must take all their other courses on campus. For the summer term ONLY, you are able to take more than one online course. CPT internships and independent study courses count as on-campus courses.

How do I know which classes will be offered next semester?

You can see courses offered in future semesters by using [USF staff search](#)  (<http://usfweb.usf.edu/DSS/StaffScheduleSearch>), but keep in mind that this is a tentative schedule that is subject to change. The final course schedule will be available 1-2 months before the start of the semester.

What courses are offered in summer?

Most of our students do internships in summer. Hence, we have relatively few course offerings in the summer. Most elective classes, and well as many core classes, are not offered in summer. We may also cancel classes that have very few students. Hence, if you plan to graduate in summer, plan your coursework carefully to ensure that you can register for the classes you need to graduate in summer.

How do we register for the GEB 6527 Lean Six Sigma class?

The Lean Six Sigma class is usually offered the week before the start of the Fall semester but is considered an alternate calendar fall class. It's also frequently offered in the spring, during the week of spring break. A permit is needed to register (see the link in the schedule search) and tuition waivers don't cover this class. NOTE: We do not control the permits for this course and you should therefore not email us asking for a permit.
